TruFIRE® Solenoids
SLD-6214 Series

Extension is connected to lead by lining up the words “I-CON” and “SYSTEMS” on the two mating connectors.
Important: Leads and connectors are color coded to match their counter part. Do not mix and match extensions. Black connector denotes 24 VAC and Red denotes 9 VDC.

Push together and slide the collar towards the opposite connector.

Turn collar clockwise to secure and assembly is complete.
